A Professional service cannot be achieved without professional staff.

It is Gallinet's team of professional Controllers that truly sets our monitoring service apart from our competitors.

We enjoy very low staff turnover with many staff into their second decade of service with the management team. All posses a deep knowledge of the industry in which they serve and have occupied a wide variety of positions within the industry.

This page provides a brief overview of just some of their profiles but clients are welcome to visit us and meet the team that actually provides the services personally.
