## Automated SIA License Verification

### News

**PeopleHours™ offers full automation from within the application for employee SIA license verification and automated e-mail notification.**

**This subscription based service offers the following key benefits: -**

- **From within PeopleHours™ operators can invoke a check of a current or prospective employees license details, name of holder, expiry date, license type, revoked status etc.**
- **The system will perform a weekly check of all employees license details and compare this against the records held by the SIA. An e-mail report will highlight any issues, revoked licenses, those that have or will shortly expire as well as any discrepancies in the name of the holder etc.**
- **The process is fully automated removing any need to remember to make checks yourself or concerns that your staff are following your procedures.**
- **In addition to the delivered e-mail users can generate reports from within the main PeopleHours™ application at any time.**
- **Both the reports and the e-mail provide a verifiable history of your verification procedure.**

**One beta customer, despite doing the laborious and time consuming SIA check each week said:** *"The report did throw up a revoked licence that we were not aware of at that time and when double checked separately with the SIA website indeed was found to be invalid."*

**Another chose the make use of the service after:** *"I checked all licences on the 3rd, the SIA revoked one on the 6th, they contacted me regarding employing an unlicensed officer on the 14th!"*

**Additional information or applications to make use of the SIA verification service should be mailed to [Support@Gallinet.Com](mailto:Support@Gallinet.Com)**
