

Work Monitor

Key Benefits

- ◆ Alerts in Real-Time for employee lateness or absence.
- ◆ Monitoring staff alerted by audio visual warning.
- ◆ Can operate in unattended mode with SMS or E-Mail alerts.
- ◆ Staff location tracking
- ◆ Contract compliance alerts
- ◆ Access anywhere via the internet
- ◆ Can be accessed via Smart Phones
- ◆ Attendance and management reports
- ◆ Allows schedule updates
- ◆ Regional or global organisational views

The Ability to monitor staff over many locations is critical for some organisations where up-to-the-minute information is vital. For others the ability to make periodic checks on the deployment of staff is sufficient.

In either situation Work Monitor, allows you to identify lateness and non-attendance of employees and where necessary make changes to ensure proper coverage is maintained.

Work Monitor allows access to real-time status reports from any internet enabled device anywhere in the world. The data gathered by Work Monitor provides accurate time-sheet information which can then verified and passed to payroll, billing and management reporting systems.

Used in conjunction with CallTaker and optional biometric devices Work Monitor will deliver substantial savings to any organisation that operates a call centre or staff management control room.

The real-time display of information by exception will highlight late or non-attendance of employees allowing for timely management directions to be made.

The screenshot shows a web browser window displaying the Work Monitor application. The URL is https://www.gallinetph06.com/mstey/schedule/WorkMonitor.aspx. The interface includes a toolbar with icons for 'Take', 'Ipoint', 'Create', 'Time', 'Allocate', 'Move', 'Erich', 'Delete', 'Info', 'Search', 'Confirm', and 'Refresh'. Below the toolbar is a table with columns: Branch, Location, Post, Employee, Call, PIN, SIN, Expected Time, and Window. The table lists various employees and their schedules across different branches and locations.

Branch	Location	Post	Employee	Call	PIN	SIN	Expected Time	Window
